## TRIANGLE INTERNATIONAL ENERGY PROJECTS

Triangle International Energy Projects is a prominent player in the energy sector focusing on projects and services both locally and regionally while committed to highest industry standards.

# Energy Projects

Triangle International Energy Projects integrates itself through Oil & Gas projects' lifecycle, both onshore and offshore, from pre-launch phase through the initial conceptual design, tendering, awarding and continues through to the actual implementation phase while providing full on-ground support during all phases of project execution.

Offshore Division's services include, but not limited to:

- Equipment supply
- Pipeline installation
- Umbilical installation
- Offshore construction
- Subsea equipment installation
- Onshore and Offshore drilling

Onshore Division is closely involved in the development of Egypt's downstream sector, through projects such as: Refineries, Oil Field Central Processing Facilities, Gas Processing, LNG, Petrochemicals, Fertilizers, Pipelines, Petroleum storage hubs and Chemical Projects.

# Trading

Triangle International Energy Projects is advancing trade by forging strong bonds with commodity producers, processors, and end users. As a globally active physical trading house, Triangle Trading Division sources trade and delivers commodities to Egyptian markets and worldwide including crude Oil, Petroleum products and natural gas.
